

# CYIENT

From Maps to Decisions

## AI-augmented Spatial Intelligence

Powered by Microsoft Fabric, Esri GeoAnalytics, and Copilot to help see exposure sooner, prioritize action faster, and decide with confidence

### What's Preventing Intelligence-led Decisions?

For many organizations, the roadblock is not data availability, but the ability to connect location, risk, and operational signals fast enough to act. This often shows up as:

- Difficulty correlating risk exposure with geography and hazard zones**
- Manual and batch-driven analysis slows underwriting decisions**
- Limited visibility into risk accumulation across regions**
- Inability to identify emerging risk hotspots proactively**
- Fragmented datasets across policy, claims, and hazard systems**

Connected intelligence gives organizations the ability to see across data silos, understand the context behind events, and act with greater speed and confidence.

### Why This Matters Now

**92% of insured catastrophe losses** now come from wildfires, storms, and floods. As risk becomes more frequent, localized, and asset-specific, organizations need spatial intelligence to know where to act first.

### Core Capabilities That Turn Fragmented Data into Connected Intelligence

**Governed, secure, scalable, and interoperable** by design, Cyient's solution connects Microsoft Fabric, Esri, and third-party ecosystems to turn real-time data into location-aware decisions, helping teams detect change, assess impact, and act faster.

**Microsoft Fabric Integration**  
Unified enterprise and spatial data foundation on Microsoft Fabric.

**Esri GeoAnalytics**  
Spatial joins, proximity analysis, geo enrichment, and risk scoring.

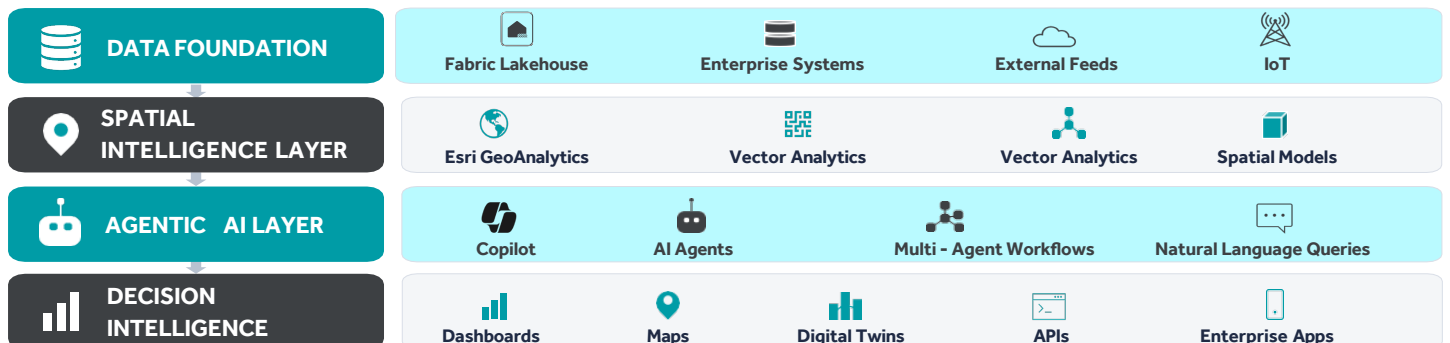

**Risk Intelligence Application**  
Interactive risk maps, hazard overlays, and drill-down analysis.

**Agentic AI Assistant**  
Natural language risk queries, automated insights, and decision support.

**Real-time Intelligence**  
Streaming data, event-driven analytics, and real-time alerts for faster response.

**Decision Applications**  
Actionable insights through maps, dashboards, digital twins, and enterprise APIs.

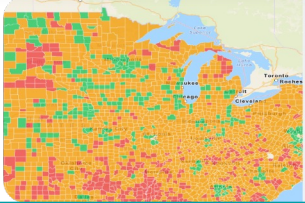

### Cyient's Intelligence Layer Behind Faster Decisions

# High Impact Use Cases Across Risk, Resilience, and Operations

### Insurance Risk Intelligence

Risk scoring, catastrophe exposure, and claims intelligence.

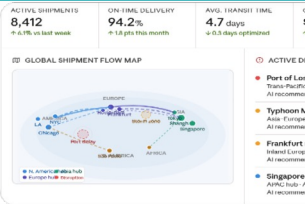

### Utilities Asset Resilience

Flood, wildfire, vegetation, and asset risk intelligence.

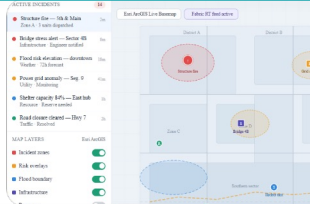

### Supply Chain Intelligence

Logistics optimization and disruption monitoring.

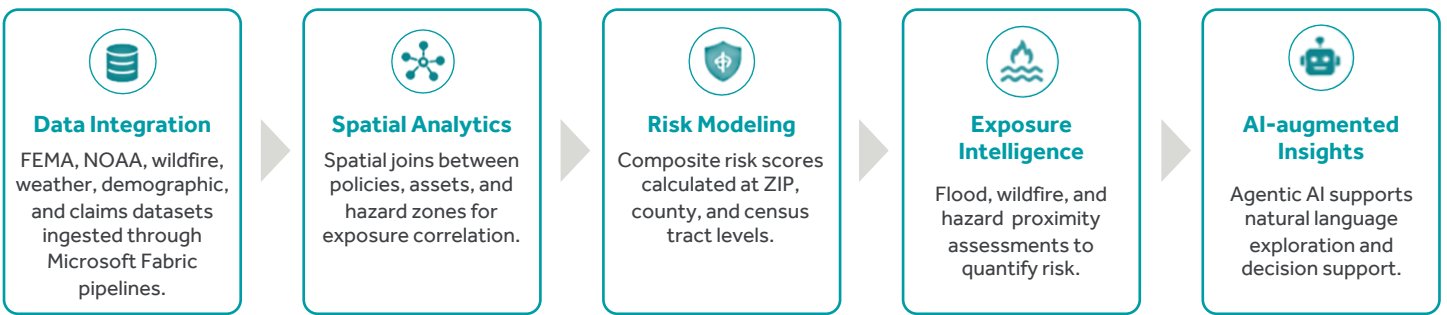

### Public Sector Operations

Emergency planning, infrastructure risk, and operational intelligence.

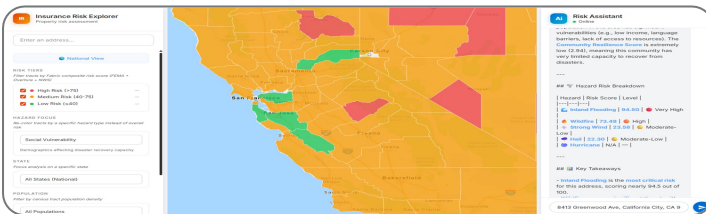

## Proof in Action: Insurance Risk Intelligence

For insurers, risk is not hidden in the data, it is hidden in the disconnect between policies, claims, hazards, and locations. Here's how Cyient Connects Policies, Hazards, and Locations.

## Impact Delivered

### Key Proof Points

- 6 Data Sources** Integrated datasets
- 85,154 U.S. Census Tracts** Analyzed for risk and exposure
- Bronze → Silver → Gold Lakehouse Architecture** Medallion architecture on Microsoft Fabric
- 0 - 100 Composite Risk Index** Based on 10 weighted risk variables

## The Cyient Advantage

- Deep domain expertise** across utilities, telecom, transportation and 30+ government clients, led by experienced GIS teams
- Ground truth for confident decisions** through reality mapping and 3D context, not just 2D maps
- Anticipate change, act sooner** with GeoAI and predictive modeling, guided by expert analysts
- Intelligence inside daily operations** via enterprise GIS integration and cloud delivery, not isolated files
- A partner proven at scale** as a 25+ year Esri Gold Partner with Imagery and Utility Network specialties

### Proven GIS depth at scale

**100+** Customers & 30+ Government Customers

**120+** GIS Projects

**35** Years of Geospatial Experience

**10+** Industries

## Ready to Detect Disruption Before It Impacts Operations?

Cyient is a global lifecycle engineering company powering mission-critical industries from design to aftermarket across products, plants, and networks. With 300+ customers and 15,000+ associates across 30+ countries, we combine human expertise, deep domain knowledge, and AI to deliver intelligent engineering solutions across Aerospace and Rail, Automotive and Mobility, Connectivity, Energy, Healthcare, Mining, Utilities, and beyond.
