

## **Infotech a finalist in Aviation Week Innovation Challenge**

**East Hartford, CT, February 27, 2012** — Infotech Enterprises is among the finalists in Aviation Week's Innovation Challenge, recognizing game-changing suppliers for their unique responses to market needs, cost improvements, and positive effects on integration barriers. There were over 130 submissions to this year's competition and innovations were identified and vetted across 10 categories by an elite judging panel representing BAE, Boeing, Northrup Grumman, Raytheon, Rockwell Collins, Rolls Royce and United Technologies Corporation. Categories for this year's competition include Aero Structures, Communications, Composites, Electronics, Process Innovation, Power and Propulsion, Sensors, Service Innovation, and Software. Infotech is among seven finalists in the Electronics category for submitting an *Explosion Proof Enclosure of Pack Control Unit of Air Conditioning System* which is designed to resolve the multiple challenges of flame, explosion and condensation in units that control cabin heat and cooling.

"Infotech partners with our customers to build new and innovative solutions to solve their industry challenges, and this innovation is an example of a joint project with one of our most valued aerospace and defense partners," said Krishna Bodanapu, President of Engineering at Infotech Enterprises. "Our engineers are honored to be recognized as a finalist in this elite global competition."

Finalists will demonstrate their newest technologies and winners will be announced at the Innovation Day on March 7, 2012 in Washington D.C., an event designed to promote, encourage, and bring to the forefront the most definitive work by suppliers from all tiers and aerospace and defense (A&D) categories. For details visit <http://www.aviationweek.com/events/current/innov/finalists.htm>.

Infotech Enterprises provides leading-edge engineering solutions, including product development and life-cycle support, process, network and content engineering to major organizations worldwide. Infotech has over 9,200 associates across 30 global locations, including two ITAR certified locations in Peoria, IL and Puerto Rico. Clients span multiple industries such as Aerospace and Defense, Consumer, Energy, Medical, Heavy Equipment, HiTech, Transportation, Telecom and Utilities and include 22 'Fortune 500' and 27 'Global 500' blue chip organizations.
