

Infotech Inaugurates New Alstom Transport RSC Engineering Center in India

Infotech Enterprises Signs New 5-year Framework Agreement with Alstom Transport for Rolling Stock and Components Engineering

Bangalore, 11 September 2013 – Infotech Enterprises established a new rolling stock and components (RSC) engineering center for its longstanding partner Alstom Transport in Bangalore, India.

On this occasion, Infotech signed a five-year framework agreement with Alstom for continued support by leveraging its proven expertise and capacity. Infotech has been Alstom's local engineering partner for more than eight years. The development of this commitment between Infotech and Alstom is the result of particularly close collaboration between sourcing and engineering teams. "Over a nine-month period, we worked extremely hard at building solid foundations for a sustainable and efficient relationship, taking account of feedback from previous years, *Make or Buy*, and the RSC Engineering vision," Philippe Brochard (Alstom Sourcing Transverse Commodities Director) explained.

The new RSC engineering center will cover all the engineering areas, with particular focus on the mechanical section. In three years' time, 350 people will be providing support for Alstom's development plan in India, a plan based on quality and the continuous improvement of skills. The new RSC engineering center from Infotech will then be able to provide support for all Alstom Transport sites.

B.V.R. Mohan Reddy, Founder and Chairman, Infotech Enterprises, commented on the occasion: "Infotech Enterprises is extremely proud to be associated with Alstom Transport. Our goal is to create trusted partnerships with our customers in order to help them drive value in their organizations through continuous improvement in the areas of quality and productivity across the product life cycle. Through this key partnership with Alstom, Infotech is committed to providing support for Alstom's growth in the Asia Pacific region, where the company has an increasing amount of activity."

About Infotech Enterprises

Founded in 1991, Infotech Enterprises provides leading-edge engineering solutions, including product development and life-cycle support, process, network and content engineering to leading organizations worldwide. With over two decades of continuous growth, Infotech leverages a global delivery and collaborative engineering model to achieve measurable and substantial benefits for its customers. Infotech Enterprises is the ideal partner for organizations that need to design innovative products faster, optimize R&D costs, increase market share, enhance operational efficiency or maximize the return on investment in networks.

Infotech has over 10,000 associates across 38 global locations. We adopt a proactive approach to serve our clients with our best-in-class delivery centers in North America, Europe, Middle East and Asia Pacific. Our clients span multiple industries such as Aerospace, Consumer, Energy, Medical, Heavy Equipment, Oil & Gas, Mining, HiTech, Transportation, Telecom and Utilities and include 22 'Fortune 500' and 27 'Global 500' blue chip organizations.
